Climate Change

Where each Party stands

Submissions

- Parties make written submissions on various agenda items
- Pre- and in-session submissions ([Submission portal](#))

Statements

- Oral and written statements during plenaries and negotiations
- YouTube recordings (plenaries, events), [Earth Negotiations Bulletin](#)

Analysis

- Observers provide updates on Parties' views on various agenda items
- E.g., [Carbon Brief](#)

The image shows a screenshot of the Carbon Brief website. At the top, there is a headline 'Who wants what at COP27' with a sub-headline 'See the extent by column, broken down by the world bank regional groups (Africa, Asia, E&S)'. Below the headline is a table with columns for 'Bloc / country', 'Topic', 'Issue', and 'Position'. The table contains the following data:

Bloc / country	Topic	Issue	Position
CARICOM	Adaptation	Give adaptation equal weight as for mitigation	High priority
ARLAC	Adaptation	Doubling adaptation finance	Support
BRICS	Adaptation	Doubling adaptation finance	Priority
CVF	Adaptation	Doubling adaptation finance	Priority
G7+China	Adaptation	Doubling adaptation finance	Priority
African Group	Adaptation	Doubling adaptation finance	Priority
LDC	Adaptation	Progress on global goal on adaptation	Support
LMDC	Adaptation	Progress on global goal on adaptation	Priority
EU	Adaptation	Work programme on the global goal on adaptation	Support

Party and Party Groups

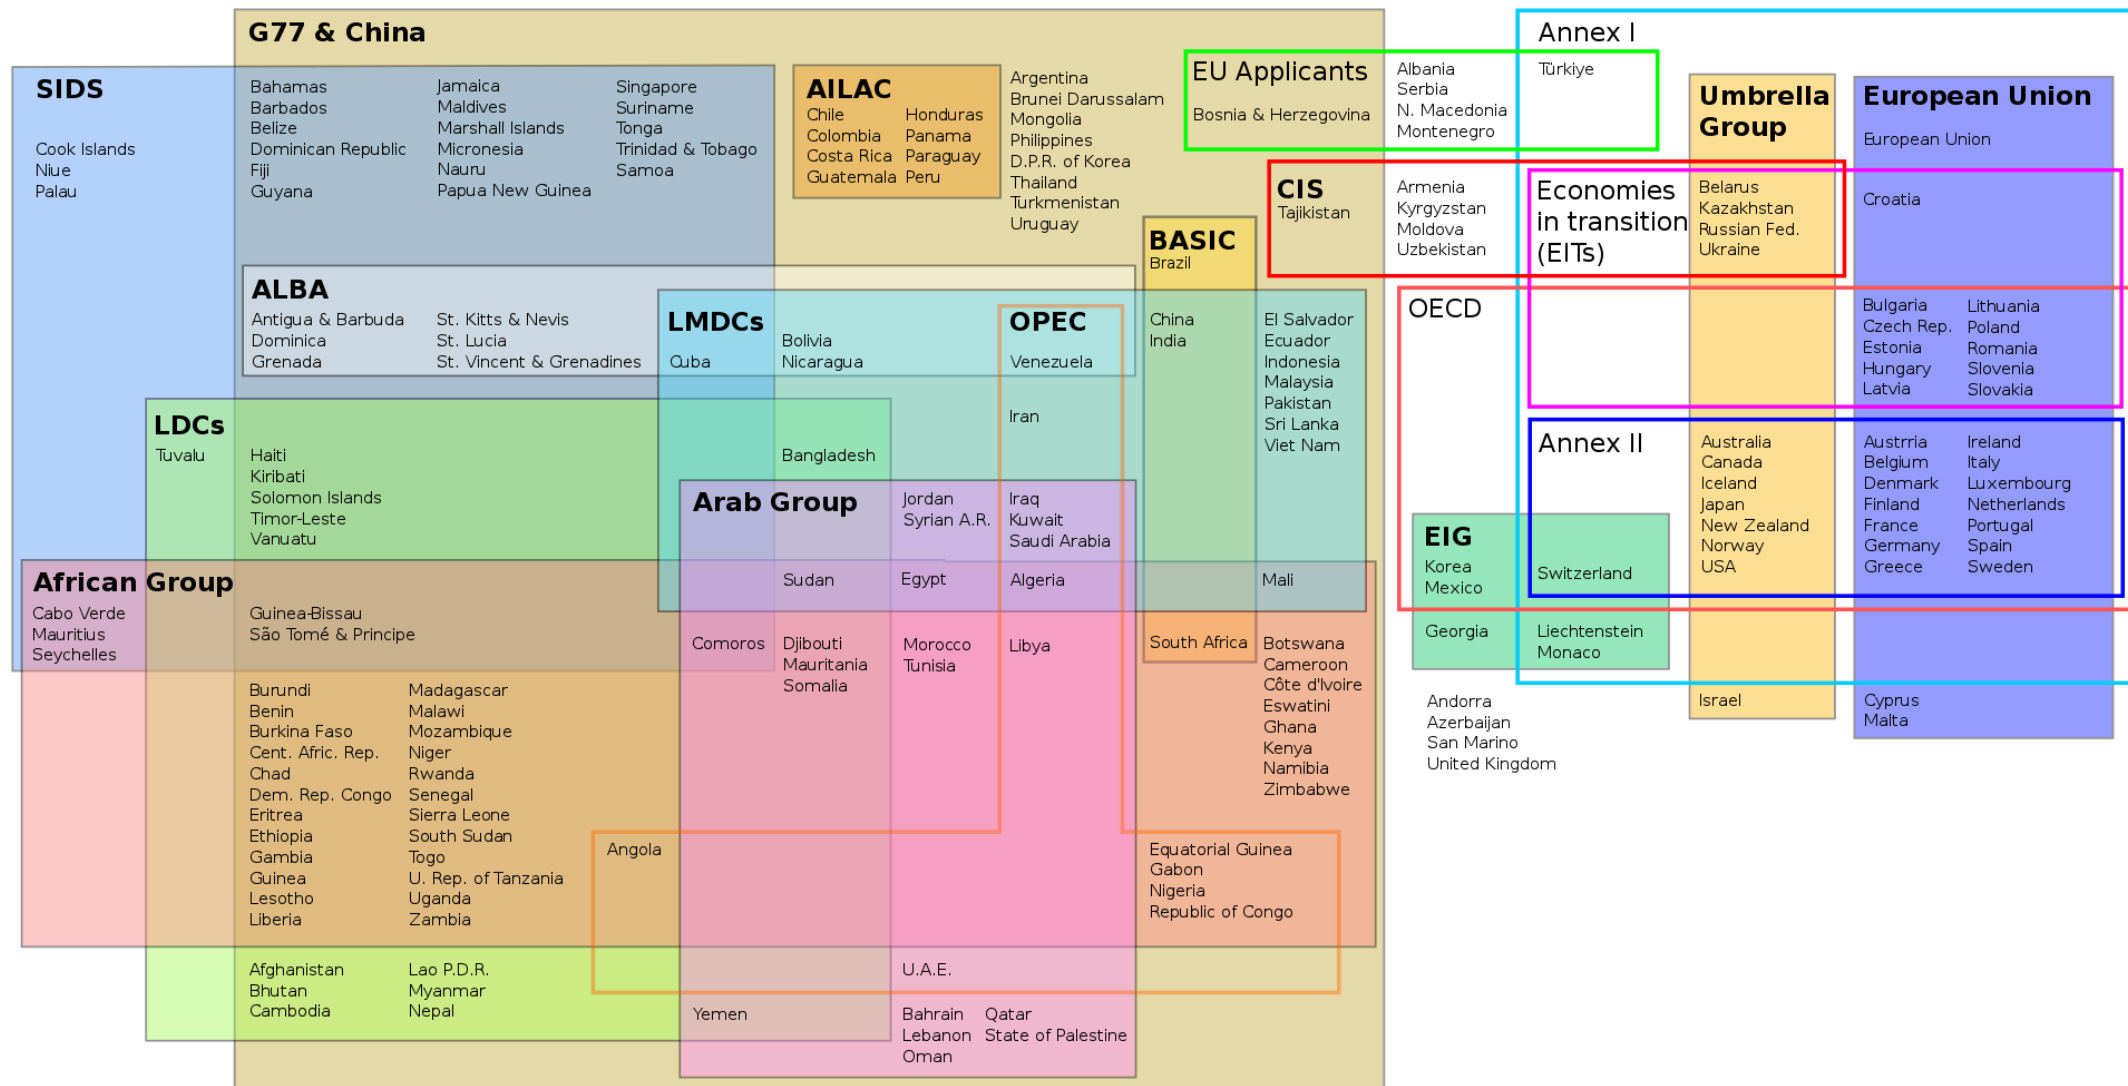

Context

- Consensus to be reached with [198 Parties](#)
- Increasing number of agenda items at the sessions
- Constraints in sending big delegations (especially LDCs and SIDS)
- Political decisions delayed until the very last minute (for high-level decision-makers)

**The need to
negotiate as
groups**
